WEST MEADOWS WILDLIFE MANAGEMENT AREA

(West Bridgewater)

GENERAL: 222 acres including a 128-acre shallow pond and marsh.
U.S.G.S. Quad: Brockton

VEGETATION: There are large areas of buttonbush and other shrubs invading areas of the pond and marsh. Most of the remaining area is well forested with large hardwood trees.

WATER: Several streams flow into the pond, and West Meadow Brook flows out below the dam and down into Mill Pond.

WILDLIFE: This area is not stocked and contains only native game including aquatic furbearers, deer, raccoon, fox, rabbits, squirrel, grouse, ducks and geese. Numerous nongame species are present.

SPECIAL

REGULATIONS: None.
